

Become A Partner, Activate your STEM Program

During LET'S GO professional development workshops, educators learn to create dynamic STEM learning environments that spark curiosity and build deep understanding. Our hands-on, minds-on approach equips teachers, facilitators, coaches, and mentors with proven strategies for engaging students in authentic STEM practices, problem-solving, and critical thinking.

Our immersive workshops provide:

- Practical experience with active learning techniques
- Strategies for facilitating project-based STEM activities
- Tools to create inclusive, engaging learning environments
- Research-based best practices aligned with PEAR Institute's Dimensions of Success
- Facilitated by certified LET'S GO trainers, these workshops build both skills and confidence, empowering educators to bring STEM programs to life in any learning environment.
